Maguindanao Province

# Status of Disaster/Emergency in Maguindanao:

- > The province of Maguindanao have been experiencing isolated rain showers due to localized thunderstorm since the start of the month and given its geographical situation as the catch basin for the downpour of upstream water that resulted to the flooding incident in the province.
- > Since October 13, 2020, there were 20 municipalities and 168 barangays that were affected by flood and over 69,000 families or 346,580 individuals were declared affected. Though, only few families fled away from their houses and seek refuge in the nearby barangays but they return back after the flood subsided.
- > To date, as water subsided, the number of flood affected municipalities decreased and so with the number of the affected families. There was a decrease from 19 to 8 municipalities and from 69,316 flood affected families to 12,643 affected families with 63,215 individuals.
- > On November 7, 2020- heavy rain started to pour in the municipality of South Upi that caused flash flood especially in the low lying areas of Sitio Gila-Gila, Brgy. Kuya, South Upi. Heavy rains resulted to the clogging of canals due to drowned trees/lumber that exacerbated the situation. This affected about 126 families. The LGU is ready to provide relief goods should situation continue.
- ❖ No casualties, no injured and no damaged houses was reported. No major damage on properties or agricultural products except to some market goods which got wet.
- ❖ At around 8 pm of the same date, the flood subsided. The BLGU and MDRRMO continued to declogged the canal and work on the clearing, monitoring and assessment continues.
