

UNHCR MINDANAO: ZAMBOANGA IDP DURABLE SOLUTIONS MAP

As of 06 May 2015

In order to provide a durable solution for displaced families, the Protection Cluster is advocating to continue shelter construction in areas where IDPs can obtain basic services and immediately access their livelihoods, health care and schooling. Families especially women and children, will be less exposed to exploitation and abuse where services and livelihoods are accessible. The IDPs of most concern are in the Grandstand, families relocated to Mampang and the many IDPs that are hosted by other families, impacting on available food and nutrition of the hosting communities.

The positive progress now being realized by the Z3R housing construction, including the areas of Mariki, Rio Hondo, Buggoc and Kasanyangan, will provide shelter in viable communities that will enable the closure of the Grandstand and reduce the number of families in Mampang. IDPs will have improved access to services in these communities where they were residing before the conflict close to central Zamboanga that are “built back better”.

DURABLE SOLUTIONS by return and relocation of IDPs to communities where families can provide for themselves is feasible in the next six month for all IDPs if the Zamboanga Reconstruction and Rehabilitation efforts continue as planned.

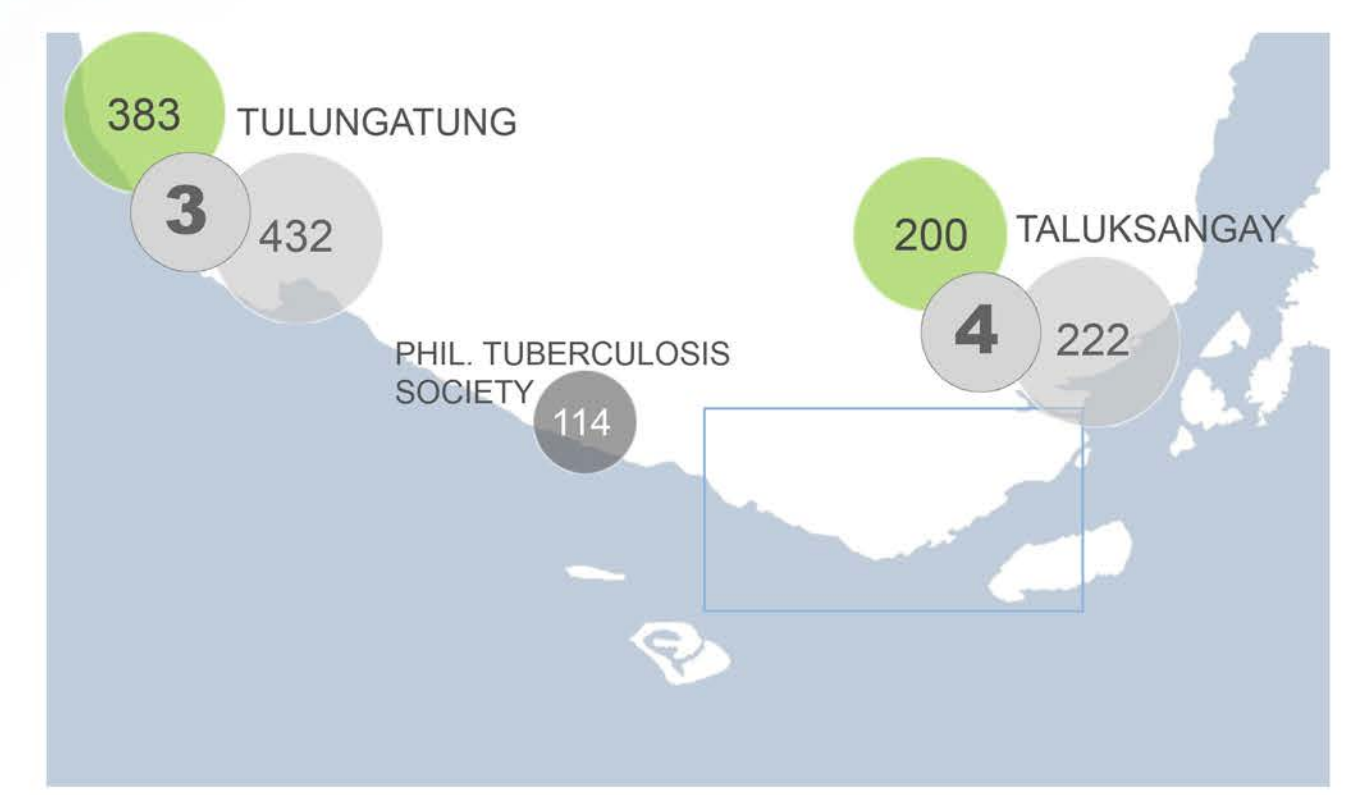

4,244 FAMILIES IN NEED OF DURABLE SOLUTIONS (12,389 PERSONS)

1,670 TRANSITORY SITES (9,104 PERSONS) (FAMILIES IN NEED OF A DURABLE SOLUTION) AS OF 27 April 2015

552 EVACUATION CENTER (3,285 PERSONS) (SOURCE: IOM/DSWD, CCCM ZAMBOANGA AS OF 27 April 2015)

2,022 HOME-BASED (11,282 PERSONS) (SOURCE: HOME-BASED PROFILING AS OF 20 OCT 2014)
